THE ORIGIN

WHY WAS ADIPOLOGIE® CREATED?

For years, aesthetic treatments have attempted to correct what is visible: volume, laxity, irregularities.

But the body does not respond to aesthetic stimuli.

The body responds to **inflammation and fibrosis of connective and adipose tissue**.

Adipologie® was born from a clear and repeated observation:

Treating the symptom without addressing the tissue leads to limited and unstable results.

Our objective is not to “reduce”, but to **re-educate**.

We treat
INFLAMED and FIBROSED
tissue

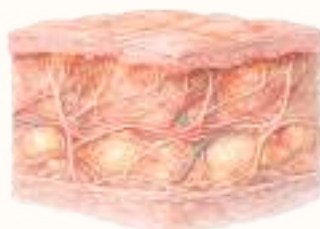

- 1 When tissue becomes inflamed and fibrotic, its metabolism is altered.
- 2 The cellular environment ceases to function properly
- 3 Cells stop responding correctly.

WHAT HAPPENS WHEN TISSUE BECOMES INFLAMED?

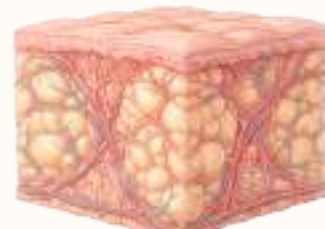

INFLAMMATION

The tissue enters a state of low-grade chronic inflammation

FIBROSIS

The tissue hardens and loses plasticity.

METABOLIC BLOCKAGE

Cells stop responding and metabolism slows down.

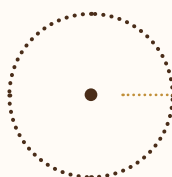

HOW DOES THIS BLOCKAGE MANIFEST IN THE BODY AND FACE?

The body speaks.
And it does so through visible signs that are not the cause, but the consequence.

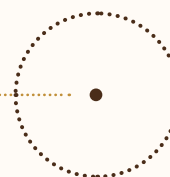

VISIBLE SIGNS

- Stubborn cellulite
- Localised fat
- Skin laxity
- Persistent inflammation
- Double chin

VISIBLE SIGNS

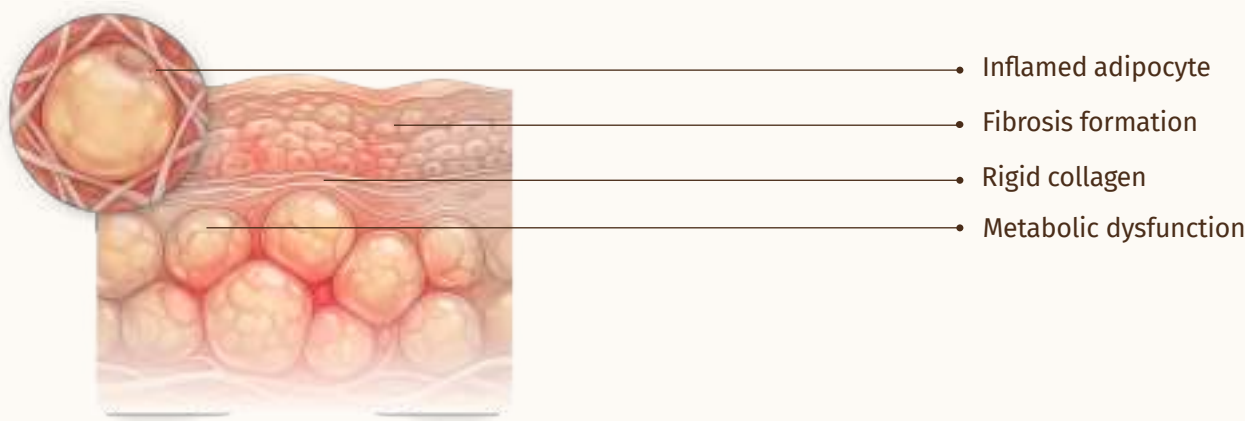

ROOT CAUSE

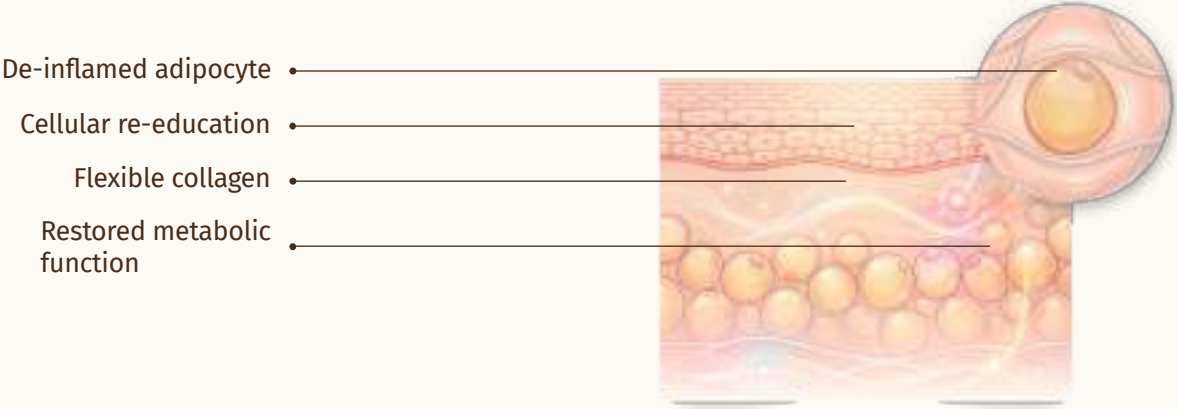

*If the problem lies within the tissue,
the solution cannot be merely superficial.*

BEFORE & AFTER

BEFORE ADIPOLOGIE®'S MULMI® TECHNOLOGY

AFTER ADIPOLOGIE®'S MULMI® TECHNOLOGY

COLLAGEN

WHY DOES COLLAGEN STOP FUNCTIONING PROPERLY?

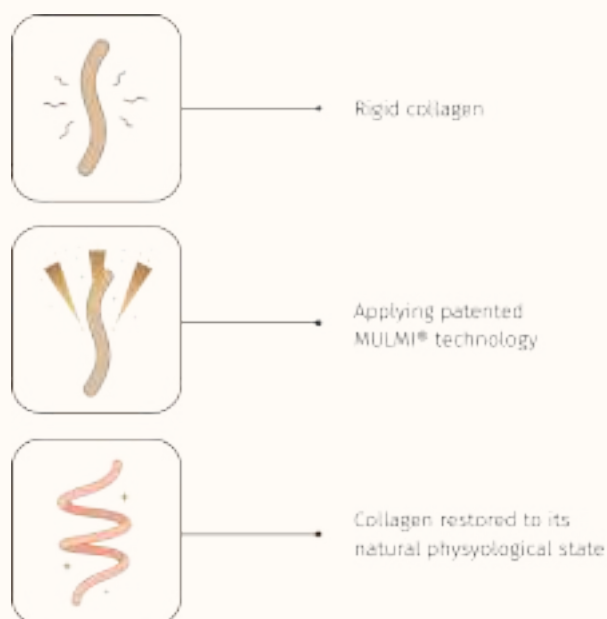

Collagen is not just a protein.

It is the structure that **supports the skin and subcutaneous tissue**. Without functional collagen, the structure becomes disorganised and loses its ability to contain the size of adipocytes.

MULMI® technology, through **mechanotransduction and cellular re-education**, enables the restoration of collagen to its natural physiological state, recovering its structural function.

In this way, we reorganise and stimulate endogenous collagen, simultaneously re-educating adipose and connective tissue.

THE PROCESS WITH ADIPOLOGIE® APPLYING MULMI® TECHNOLOGY

HOW ADIPOLOGIE® WORKS AND WHY IT IS DIFFERENT

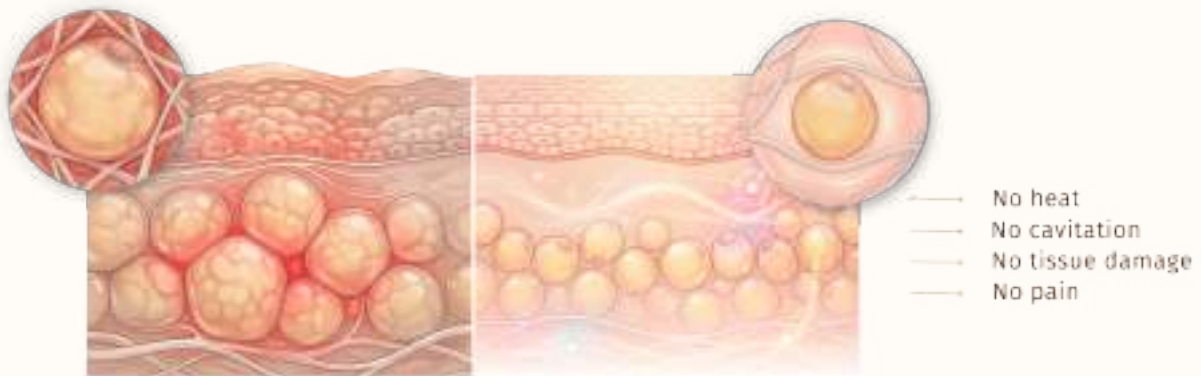

Adipologie® does not act only on the surface.

It acts **simultaneously on the dermo-hypodermal tissues** and, most importantly, at the cellular nucleus, **re-educating the tissue from within**.

It is a **patented technology**, manufactured in Spain, designed to work in depth and without side effects.

BEFORE ADIPOLOGIE®

WITH ADIPOLOGIE®

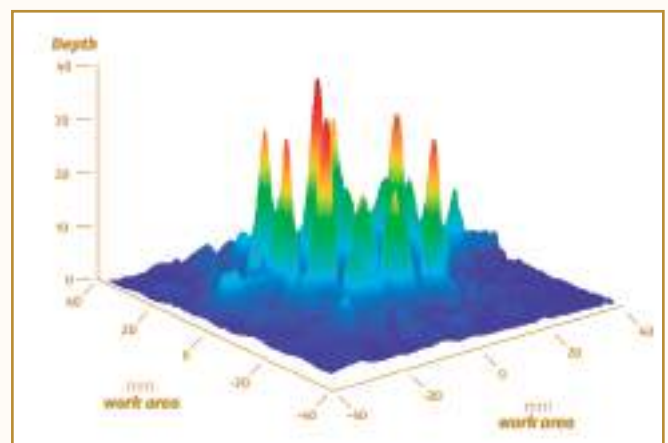

THE SCIENCE BEHIND IT

MULMI®

Multifocused Ultrasound Low Mechanical Index

- **Low frequency (< 500 kHz):** Allows working deep within the adipose tissue.
- **Low intensity (< 1 W/cm²):** Ensures a comfortable experience with no thermal effect.
- **Multifocal:** Optimises results by delivering homogeneous treatment across larger body areas in reduced time, thanks to a coverage range of approximately 24 cm³ per shot.

Area of action of the MULMI® acoustic field •

Study conducted at the Polytechnic University of Catalonia •

ADIPOLOGIE® PATENTED TECHNOLOGY

Adipologie® holds a **technological patent** developed by professionals with more than 20 years of experience in the aesthetic sector.

A seal that guarantees what we offer is unique, safe and scientifically proven.

WHAT DOES OUR PATENT MEAN?

INVENTIVE CAPACITY

Technological innovation that has not existed until now.

GLOBAL INNOVATION

A truly unique technology worldwide.

INDUSTRIAL APPLICABILITY

Technological reproducibility in an industrial environment.

50%
ADIPOCYTES

Adipologie® works on the adipocyte, **re-educating its behavior** and promoting a more **efficient metabolism**.
The tissue restores its balance **without aggression** or destruction.

REAT...

50%
COLLAGEN

Adipologie® acts on **connective and adipose tissue**, stimulating **fibroblast activation** and **collagen reorganisation**. The result is firmer, more elastic and physiologically functional skin starts from within.

CELLULAR RE-EDUCATION PROCESS THROUGH ADIPOLOGIE®

Observation of adipocyte behavior throughout the process, comparing it with the results obtained between sessions.

COMPARISON OF TECHNOLOGIES

	MULMI®	RADIOFREQUENCY	HIFU	CRYOLIPOLYSIS	EMS	VACUUM	PRESSOTHERAPY	SHOCK WAVES
SOFT LOCALISED FAT	×		×	×				
FIBROTIC LOCALISED FAT	×							
SKIN TIGHTENING	×	×						
CELLULITE	×	×	×			×		×
BODY CONTOURING	×	×				×		
PAINLESS	×	×					×	
ATHERMIC (NON-THERMAL)	×					×	×	
COLLAGEN REORGANISATION	×							
MUSCLE STIMULATION					×			

Adipologie® does not attack or damage **the tissue**.

It is non-invasive.

It works by re-educating the cell, helping the tissue recover its balance.

It acts simultaneously on connective and adipose tissue,
respecting the body's natural function.

PROFITABILITY

SESSIONS

Short:

Sessions from 20 to 40 minutes per area.

Spaced:

Minimum interval of 15 days.

Protocols:

Body: 6 to 8 sessions.

Facial: 8 to 10 sessions.

No seasonality:

Suitable all year round.

*While your clients carry out their daily activities,
the technology continues working,
maximising results.*

WHY CHOOSE ADIPOLOGIE®?

Attracts **new clients** and increases **repeat visits**.

Our **technology** is patented worldwide.

Optimises time and costs.

Fewer sessions, greater profitability.

OPTIMISE YOUR DAY-TO-DAY CLINIC WORK

Intuitive software and easy-to-use interface.

Comfortable to operate while seated.

Functional design and ease of handling.

BODY

Request a DEMO and conditions for your center (training included).
Results may vary.
It does not replace healthy lifestyle habits.
Basic contraindications.

FACE

Request a DEMO and conditions for your center (training included).
Results may vary.
It does not replace healthy lifestyle habits.
Basic contraindications.

BODY

Re-education from within. Restoration of tissue functionality.

We work on adipose and connective tissue using patented **MULMI®** technology (Multifocused Ultrasound Low Mechanical Index).

It reduces inflammation and reorganises the body structure, achieving visible and natural remodelling.

UPPER AREA

Arms and breasts.

MID AREA

Core, flanks and back.

LOWER AREA

Saddlebags, buttocks and legs.

We transform tissue in a respectful and effective way across multiple areas of the body:

Cellular re-education

Reduction of localised soft and fibrotic fat

Progressive reduction of cellulite in its different grades

Tissue compaction and improved firmness

Redefinition of body contours

Overall improvement in skin quality and texture

Increased tissue oxygenation

Structural prevention of skin laxity

RESULTS

- More defined contours
- Visible volume reduction
- Smoother, firmer, and more even skin
- Healthier, more functional tissue

Results are natural, progressive and long-lasting,
as they are achieved while respecting the body's
physiology and restoring tissue functionality.

FACE

Reorganisation of facial architecture.

Re-educating from within.

We work simultaneously on **adipose and connective tissue (fascia and fibroblasts)**.

We reduce **tissue inflammation**, improving **structural tissue quality**, restoring **cellular functionality**, **softening asymmetries** and preserving the **natural appearance** of the face.

TIGHTENING

Nasolabial folds and cheekbones.

LOCALISED FAT

Double chin (submental area) and jawline contour.

We restructure and firm facial tissue in multiple areas of the face

Double chin

Global tissue restructuring

Mild to moderate skin laxity

Loss of jawline definition

Mild asymmetries

Improvement of skin texture and quality

Prevention of structural aging

RESULTS

- More defined contours
- Visible volume reduction
- Smoother, firmer, more uniform skin
- Healthier, more functional tissue

Results are natural, progressive, and long-lasting, as they respect the structure and physiology of the face, rebuilding its harmony from within.

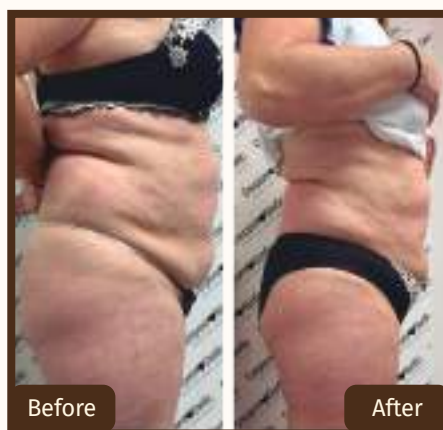

BODY RESULTS

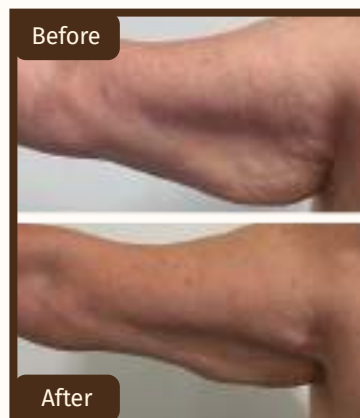

50 years
After 10 sessions

60 years
After 2 sessions

50 years
After 2 sessions

75 years
After 4 sessions

FACE RESULTS

43 years
After 3 sessions

55 years
After 3 sessions

52 years
After 4 sessions
